

# COMPANY PROFILE

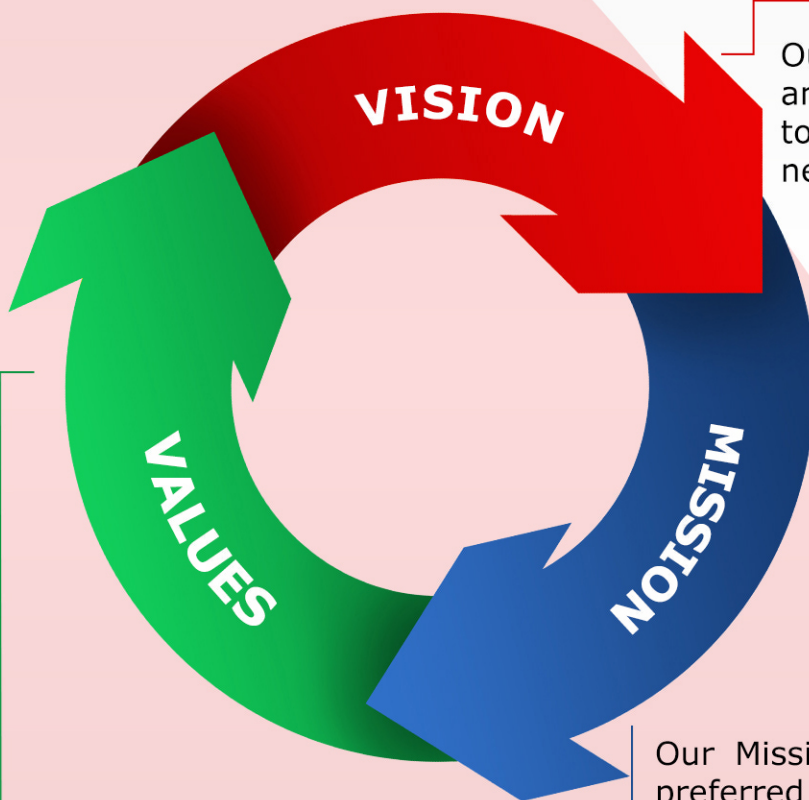

**coolink.ng**  
HIGH-SPEED INTERNET

# ABOUT US

With the headquarters in Lagos, Coollink.ng (Coollink) is an Internet Service Provider and System Integrator with nation-wide coverage, supporting our customers and partners through our presence in Abuja, Port Harcourt and Kano and through our vast network of partners across all 36 states of Nigeria. With strategic alliances and partnerships, we have been able to extend our coverage and services to several other countries across Africa and the Middle East.

# STRATEGY

Our vision is to provide reliable and affordable Internet access to every household and business in Nigeria and Africa

We believe in keeping our customers and partners satisfied by respecting our Service Level Agreements (SLA) while meeting and exceeding their expectations. This drive for high customer satisfaction has pushed us to constantly innovate and improve on our services using new technologies and delivering tailor-made solutions for individual sectors and markets

Our Mission is to make Coolink the preferred Internet service and value-added services provider to all our stakeholders by delivering outstanding connectivity, personalized customer care and support, and the best possible user experience. We achieve this through our entrepreneurship, superior quality delivery and unique human resources and partnerships

# MILESTONES

**2003**

Coollink.ng was granted an ISP license and a frequency spectrum by the NCC in (NCC INT/066/01)

**2010**

Coollink.ng expands its presence to Abuja, Port Harcourt and Kano

**2001**

Coollink.ng was founded to provide connectivity and ICT support to the AIM Group

**2009**

We were the 1st African ISP to sign a partnership with Yahsat to deliver its Ka-Band broadband service, YahClick, with the aim of increasing broadband penetration by offering affordable and reliable internet access across Nigeria.

# facebook

**2016**

Coollink.ng, in partnership with Facebook, became the first ISP to deploy Express WiFi hotspots across Lagos, a connectivity initiative part of Internet.org, with the aim of empowering local entrepreneurs and delivering affordable internet to their communities

# eutelsat

**2017**

We signed an agreement with Konnect Africa (a Eutelsat initiative) to expand our Ka-Band services across the continent and offer tailor-made solutions to meet the requirements of all sectors and markets.

**2012**

We were the first ISP to launch YahClick in Africa

**2017**

Coollink is appointed as a Strategic Partner by NSSL-Global to bring reliable L-Band coverage to remote areas of Nigeria where mobile services are non-existent or erratic, targeting sectors such as Government, Media, Finance, Mining, Oil & Gas and eHealth

# Asta

**Satellite Broadband Everywhere**

Asta, launched in Q4 of 2017, is our revolutionary Ka-Band satellite broadband service, delivering speeds of up to 80 Mbps across Nigeria, regardless of the location or the terrain. With Asta, our partners and customers benefit from affordable and tailor-made plans, data roll-over, more flexibility and better control of their networks.

We designed Asta to satisfy the requirements of customers in all sectors, delivering speeds comparable to those offered in Europe and the USA and at more affordable rates.

With antenna sizes of 74 and 98 centimetres, Asta can be deployed anywhere across Nigeria in a matter of hours and not days, making it ideal for NGO's, oil and gas companies, construction companies, financial institutions, Logistics companies, hospitals and clinics and many more.

# WHAT WE DO

## Network Connectivity

From Dedicated Internet Access to Virtual Private Networks (VPN) and MPLS networks, we connect your homes or offices anywhere in Nigeria through our terrestrial and satellite networks, providing services and solutions to meet the most complex requirements.

## Managed Services

Enterprises can count on us for data centre colocation, cloud services, disaster recovery and LAN management. We provide our customers with products and services to help them maintain trouble-free networks.

## Network and Data Security

From virus infection to Denial of Service (DoS) attacks and SPAM, Coollink has the right solution for you. We have partnered with different vendors to offer a suite of products to protect your data and network security from internal and external threats. The list of names includes Kaspersky, Cyberoam, Cisco, Sophos and many more.

## Email Services

With less dependency on local infrastructure, more customers are relying on Coollink to deliver cloud-based email services ranging from Hosted Exchange to Microsoft Office 365 and cloud email servers with on-demand resources.

## **Maritime Broadband**

When on the sea, the environment can be very tough, so it is important for the ship, the crew and passengers to always stay connected.

Our Maritime connectivity solutions below, will improve your at-sea operations, crew motivation and passengers' entertainment.

- Data, Internet, telephone, navigation solutions for vessels
- Crew connectivity, including voice, Internet and TV
- Entertainment for passengers like on-board video, live TV, telephone and of course Internet access

Coollink's maritime satellite communications solutions are available worldwide.

## **Government Connectivity**

Reliable communication systems are essential for government operations that cover military, intelligence, homeland security, law enforcement, and public safety. Access to secure voice, broadband data, and network infrastructure for Heads of States, embassies, government offices, borders and defense corps are crucial connectivity solutions for the Government operations.

Coolink, in partnership with NSSLGlobal, offers reliable, highly efficient and flexible solutions focusing on border controls, mobile communications, encryption, emergency response and humanitarian aid. We bring together the satellite solutions from key providers such as Inmarsat, Globalstar, Thuraya and Iridium to offer options across C-, L-, Ka- and Ku-Band networks.
